

# FOR COOLING OUT LOUD

## SPAL Corners the Market in Transport Refrigeration

SPAL Automotive UK is attending TCS&D Cold Chain Hub as part of the Innovation & Technology in Transport (ITT Hub) event on 10-11 May, 2023, to show off the world leading range of high-performance brushed and brushless drive axial fans and new cooling pumps.

Transport refrigeration is a key market for SPAL because wherever a supermarket delivery van is unloading its weekly shop, it's likely that there are 3 fans onboard keeping that cargo at the right temperature from door-to-door. With around 38,000 of these vans on the road, that's whole lot of cooling.

SPAL Automotive UK will be partnering at the show with one of its top customers, Longhurst Refrigeration whose business it is carrying out servicing and maintenance of these hard-working vehicles fitting SPAL's robust, reliable and longlife fans.

*Come along to Farnborough International Exhibition and Conference Centre,  
Stand No. Cold Chain 1748  
for SPAL and 1750 for Longhurst Refrigeration.*
