

# FOR COOLING OUT LOUD

## Next Stop #LowCarbonAgri

With a successful appearance at LAMMA Show packed away and tied up in bow, next on the horizon is Low Carbon Agriculture, 7-8 February dedicated to all things aimed at reducing carbon emissions in the sector.

While the decision to delay stringent Euro 7 emissions standards in the agriculture and off-highway sector has slowed down the transition to lower emissions, SPAL has been playing its part retro-fitting electric fans arrays to replace hydraulic fans. This cleaner solution is a route to increasing the overall efficiency of the cooling system and contributing to reduced emissions with the added bonus of a low energy draw.

Pop along to the NAEC at Stoneleigh to stand 508 to find out more.

WE'RE EXHIBITING ON STAND 508

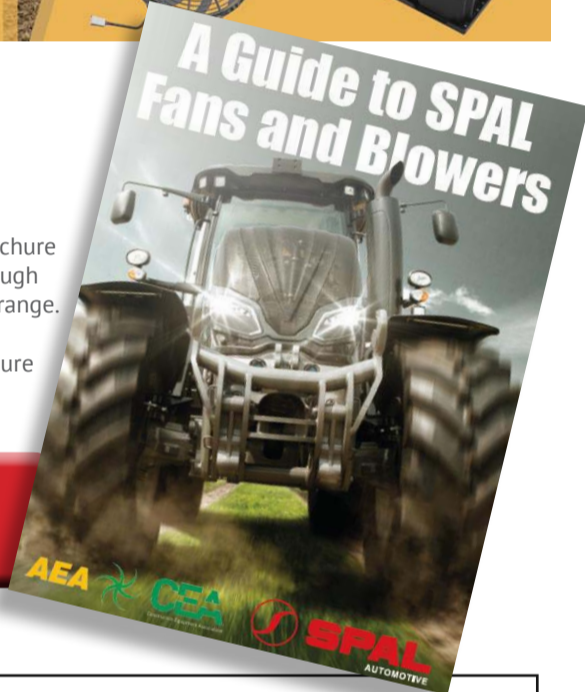

## ICYMI

In case you missed it, we produced a brochure for the LAMMA Show in a handy flip through format for a speedy view of our product range.

Go to our website and click on the brochure icon to have a look.
